

Studio Zung

Bespoke Kitchens, Tailored Wardrobes & Fine Cabinetry

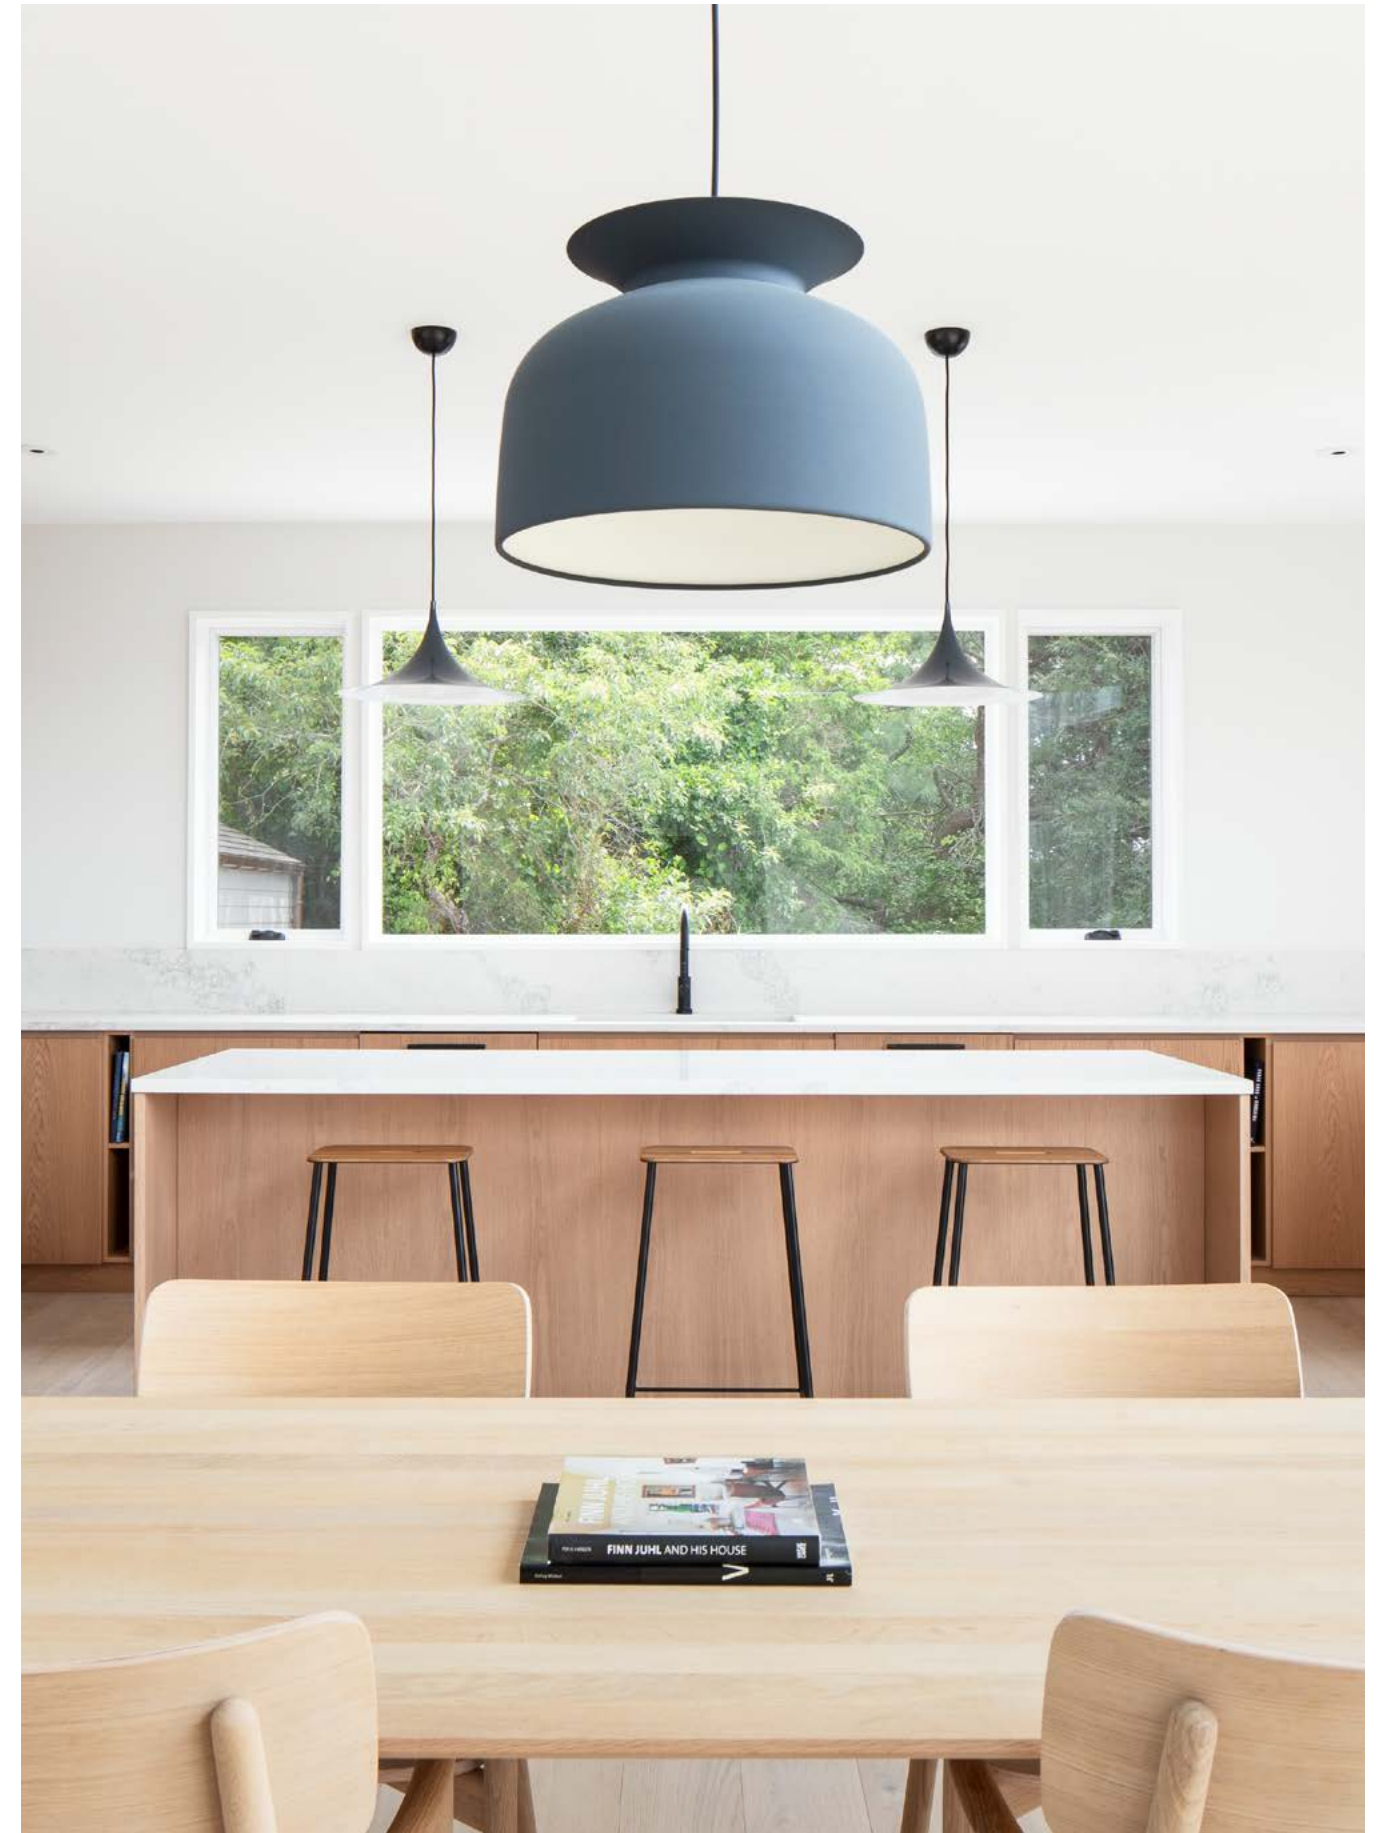

Studio Zung

Great buildings. Great brands. Great Experiences.

Studio Zung is a multi disciplinary architectural design and branding firm that creates aesthetically beautiful, economically responsible, environmentally sustainable spaces and environments. Named by Architectural Digest in 2015 as one of the top 10 American Architecture firms to watch, Studio Zung has designed and built numerous noteworthy residences and hotels in the Hamptons including Sean MacPherson's Inn and Restaurant, The Crow's Nest, and a private residence in Bridgehampton for the founder of Bumble and Bumble, among others.

At Studio Zung every project begins with a thoughtful and innovative concept that transforms into an intelligent, inspiring, and remarkable human environment. We believe every project should not only be meaningful and beautiful, but also economically responsible and environmentally sustainable.

Every detail, every decision of Atelier by Studio Zung is taken care of by our award winning architects and designers who, after decades of industry experience, understand and epitomize the Studio Zung lifestyle - simple, holistic, and luxurious design. This lifestyle translates into the Atelier by Studio Zung Residences: highly intelligent, integrated, and extraordinarily stylish homes.

A Holistic Lifestyle

Handcrafted Quality

Crafted by skilled artisans who share our love for attention, detail, and the emotive qualities of carefully chosen materials; all of our bespoke kitchens, tailored wardrobes, fine cabinetry, handcrafted furniture, products, and objects embody the highest quality of luxury layered with artisanal simplicity.

Designed with the Senses

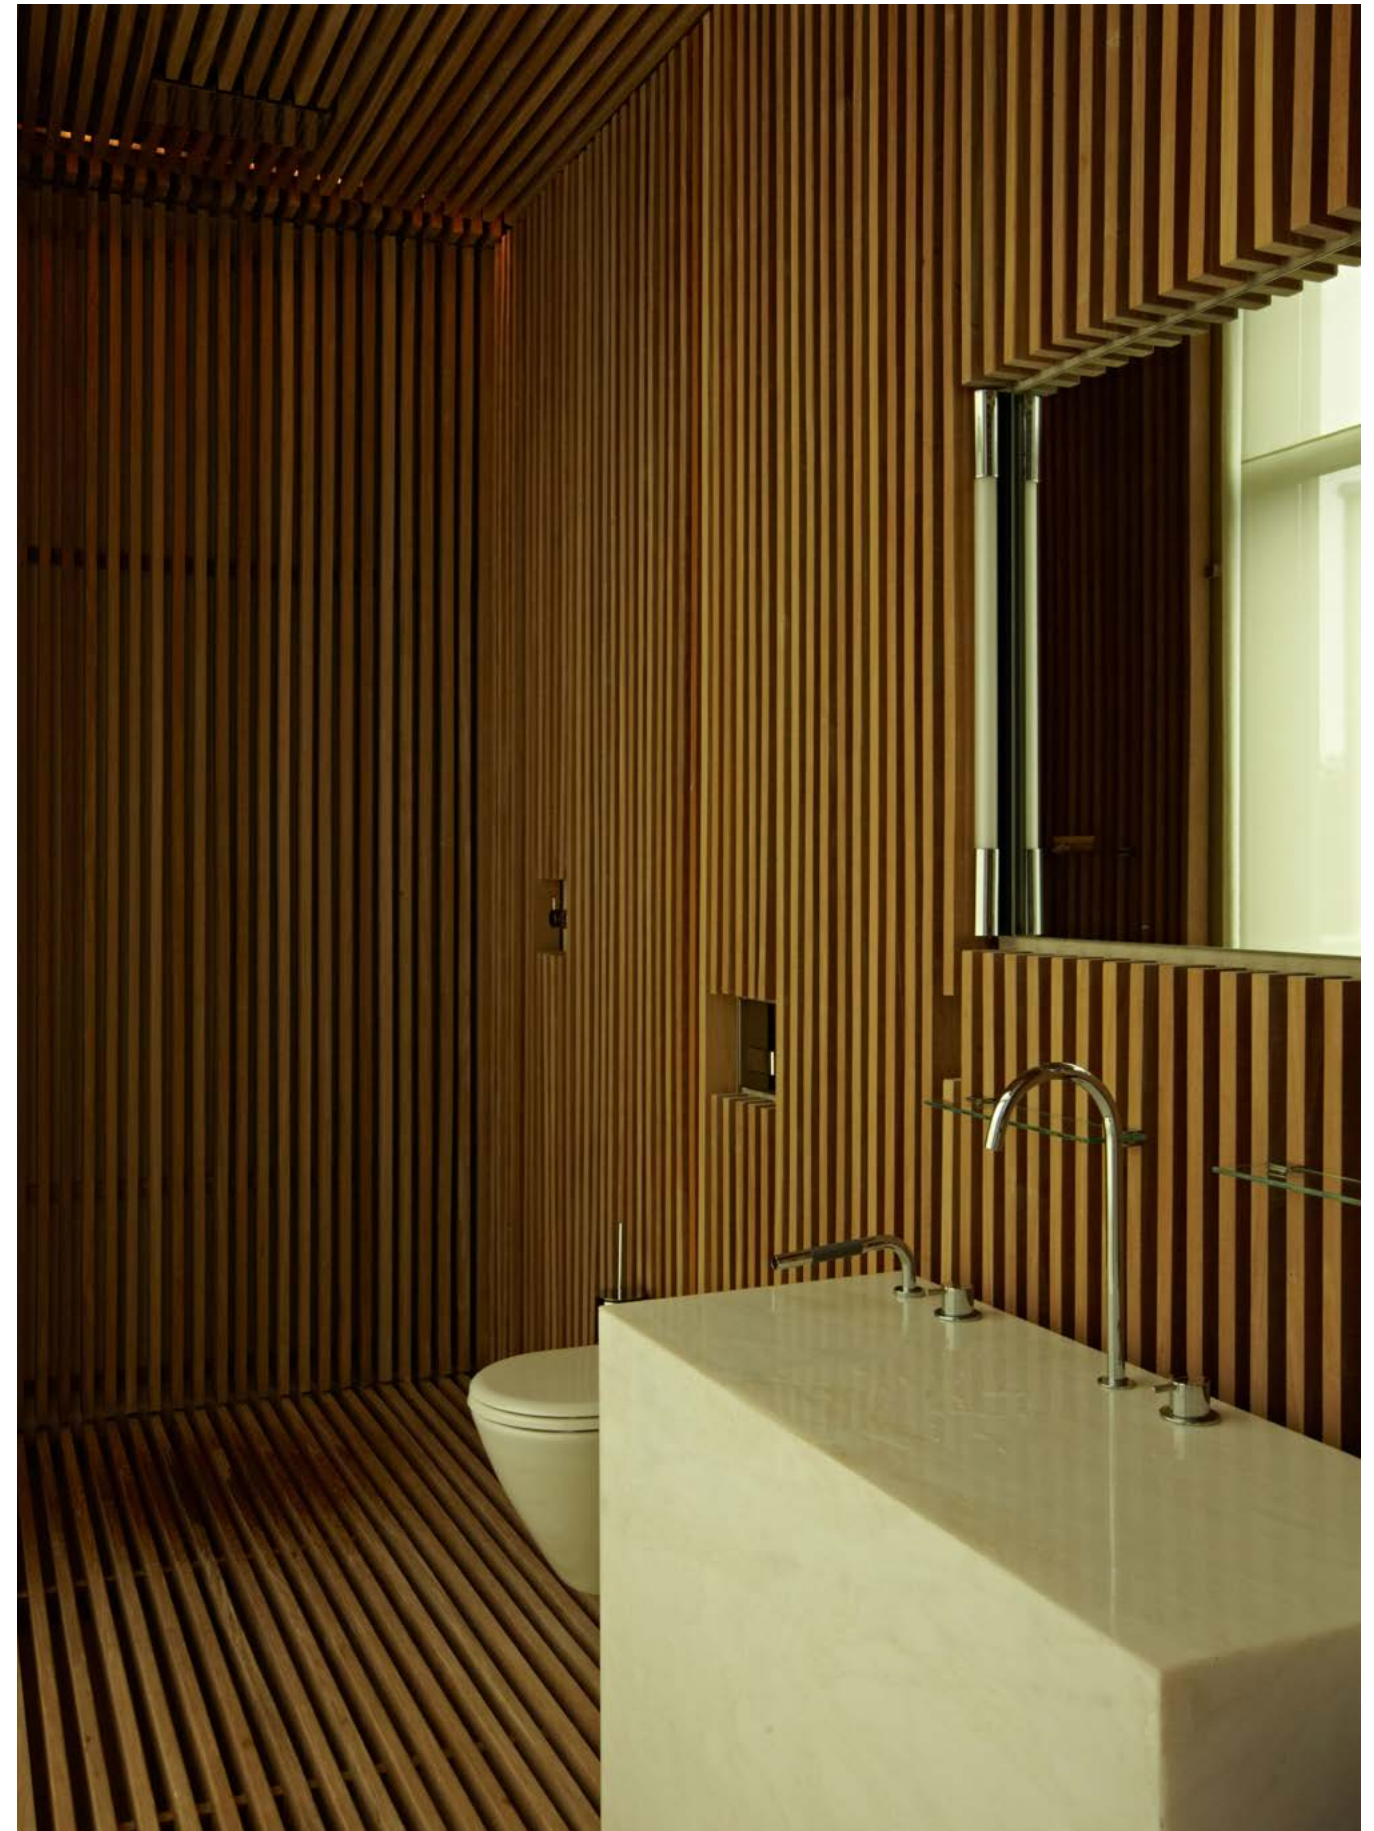

Studio Zung designs, manufactures, and installs luxury kitchens, vanities, and wardrobes with all of our senses considered. The solution plays with materiality, heights, and surfaces that structure our designs. We invite you to take a closer look at luxury.

Handmade and Installed

Not mass produced to fit the tastes of the many, but fine-tuned to work harmoniously with each environment, our handcrafted furniture is handmade and bespoke on all levels, from conception to completion. The choice of home installation and delivery is yours.

Long-lasting Materials

Materials matter. We believe in choosing our materials wisely, because we want things that last, last for a long time. To challenge the throw-away mentality, we source the highest quality materials and marry them with our deep appreciation for precision, creating timeless, living environments that age beautifully.

Bespoke Kitchens

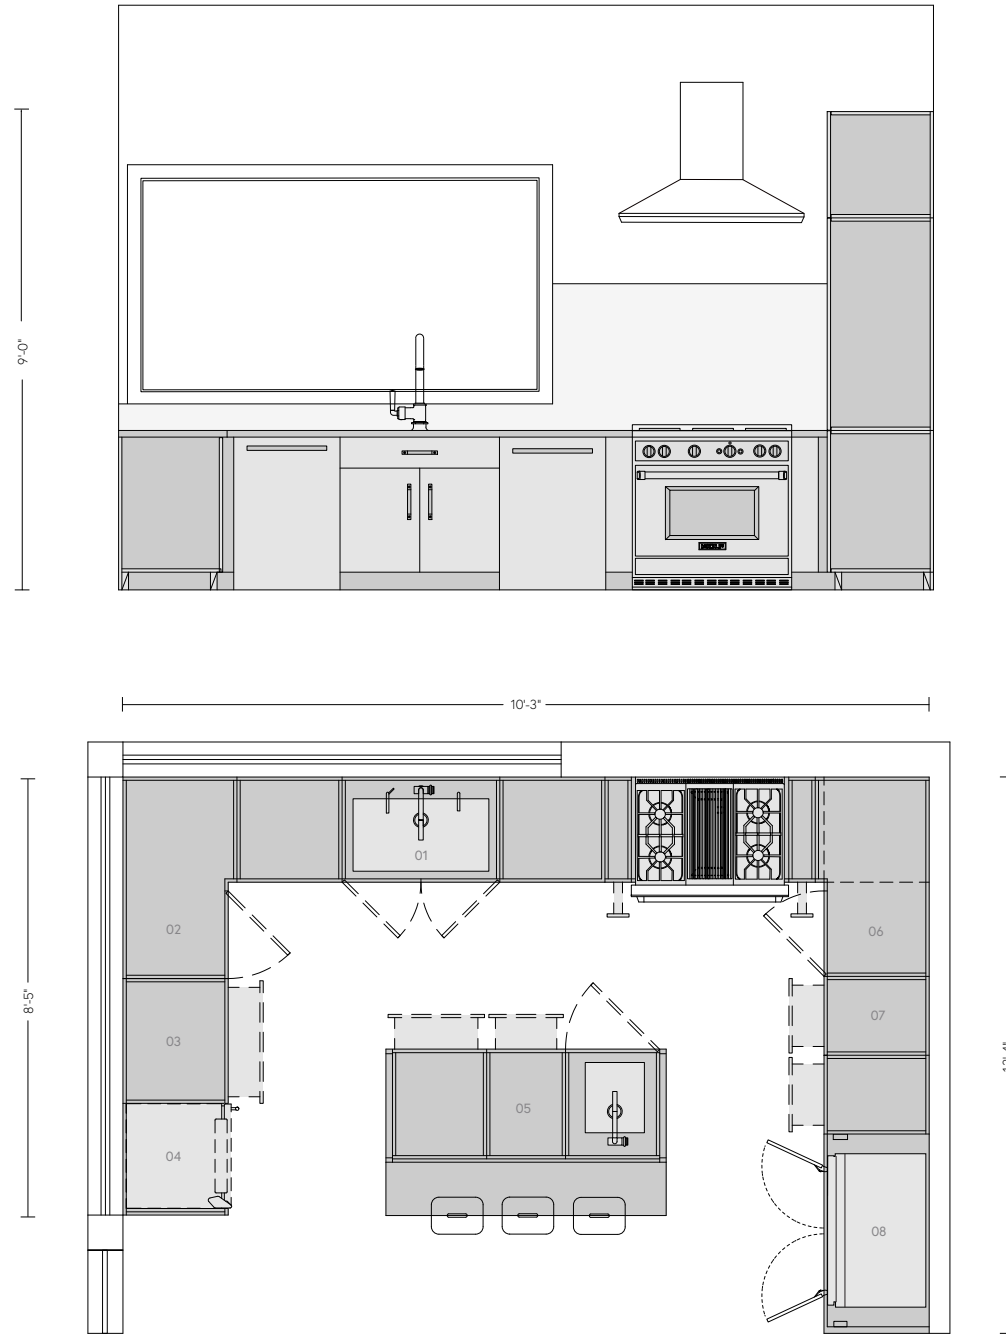

The Artistry of Living

An intelligent curation of finishings and technologies that consider the emotive qualities surrounding the kitchen. Our holistic approach integrates bespoke pieces of cabinetry, countertops, and islands into the architecture itself. Handcrafted using materials from our Earth, such as natural stone and wood, every detail is bespoke from the handles to the cabinets.

Details & Finishes

Sensuous Materiality

We offer a deep understanding of the field of select finishes, furnishings, artwork, and landscaping to ensure every space is personalized and refined. Our holistic approach to creating mindful spaces starts by considering the materials we use. Studio Zung makes it a priority to choose the right materials that will stand the test of time.

A personal finishing touch with Studio Zung signature stitching

Architectural Hardware

Carefully Considered

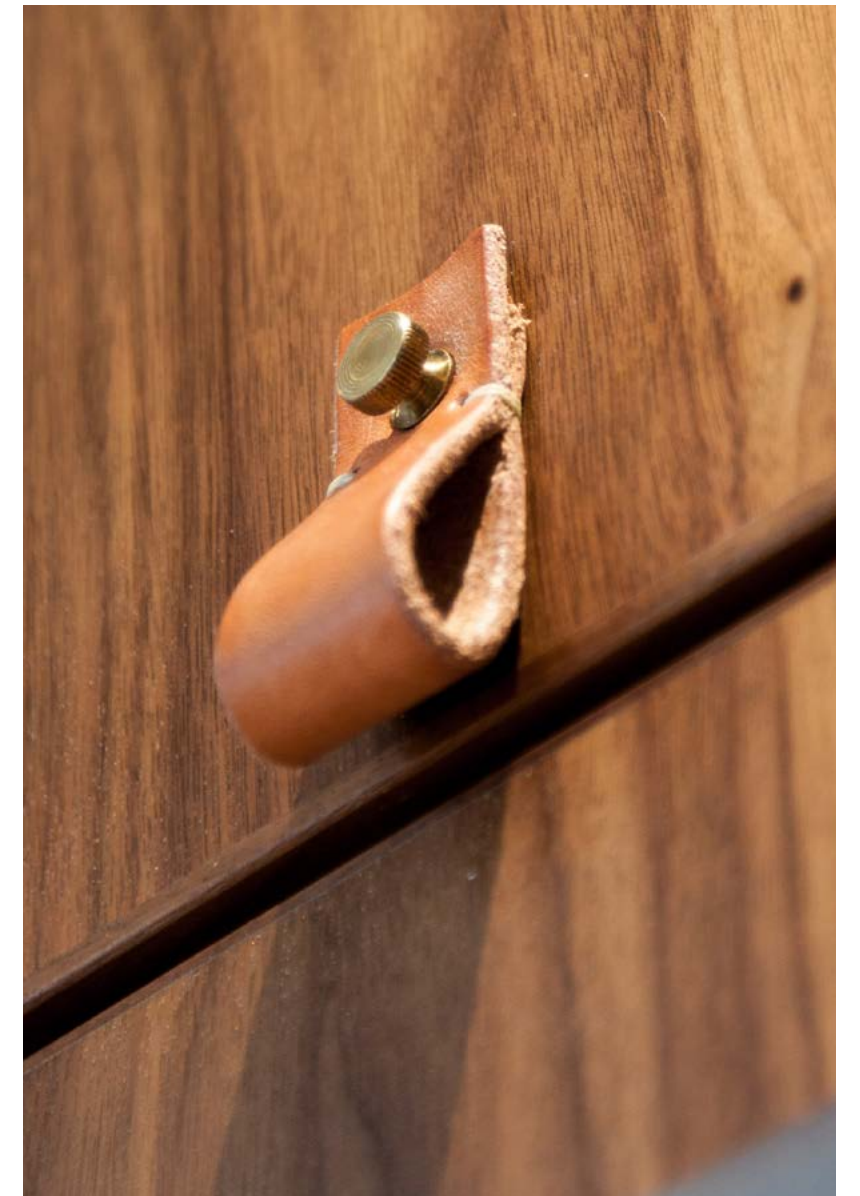

Simple, purposeful details can make the greatest impact. Through reconsidering the element of touch in our daily lives, the Studio Zung Leather Handles were born. Oak bark tanned leather, waxed stitching, burnished edges, brass thumb screw, and wing nut hardware; these handles balance modern efficiency with fine craftsmanship.

Studio Zung Leather Handle N° 2

Each handle is handmade in New York

The leather will develop a patina and change over time into a more rich, aged finish

Studio Zung Leather Handles
